## Abstract

On 31 December 2019, pneumonia of unknown cause was detected in Wuhan, China, and was first reported to the WHO Country Office in China. On 30 January 2020, the outbreak was declared a Public Health Emergency of International Concern. (1) It was an outbreak of severe acute respiratory syndrome corona virus 2 (SARS-CoV-2) infection that occurred in Wuhan, Hubei Province, China and got spread across China and beyond. WHO officially named the disease - Corona virus Disease 2019 (COVID-19) on February 12, 2020. (2) It has been spreading worldwide for a period of atleast a year & half (3) This review article addresses the current scenario caused by the SARS- Co V along with the treatment protocols and ongoing vaccines.
