

**TABLE 3: Summary of pharmacokinetic data for 14<sup>th</sup> day of Bedaquiline 400 mg OD**

<b>C<sub>max</sub></b>	5937.1ng/mL
<b>t<sub>max</sub></b>	5 hrs
<b>AUC<sub>(0-24)</sub></b>	65780 ng *hr/mL

**Abbreviations:** C<sub>max</sub> is maximum plasma concentration, t<sub>max</sub> is time to reach maximum concentration, AUC<sub>(0-24)</sub> is the area under the curve for the first 24 hours, AUMC<sub>(0-24)</sub> is the area under the first moment curve, t<sub>½</sub> is time to reach half of the concentration, MRT is the mean residence time.
