Figures S1 to S16

Introduction

Here are presented 16 figures related to the 26 mesoscale eddies studied in the article. This supplementary material presents the thermohaline anomalies on isopycnals computed using climatological averages. The methodology to obtain these figures has already been detailed in the corresponding article. As described in the article, the horizontal resolution drives uncertainties on computed quantities as well as their shapes. Eddies are grouped by cruise.

1. EUREC4A-OA

Figure S1. AE N°1 sampled during EUREC4A-OA experiment.

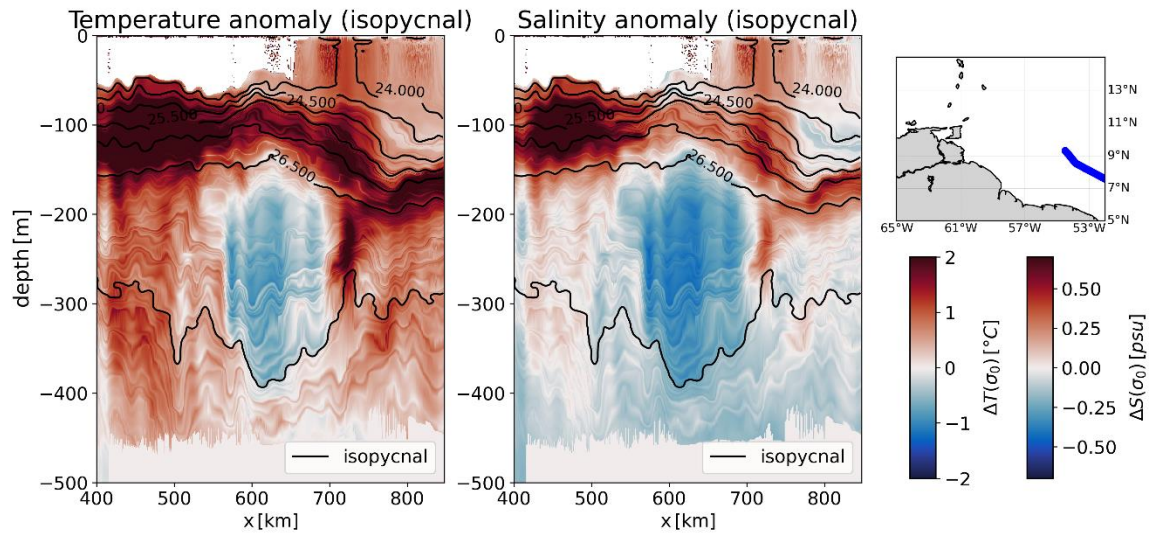

Figure S2. AE N°3 sampled during EUREC4A-OA experiment.

2. MSM60

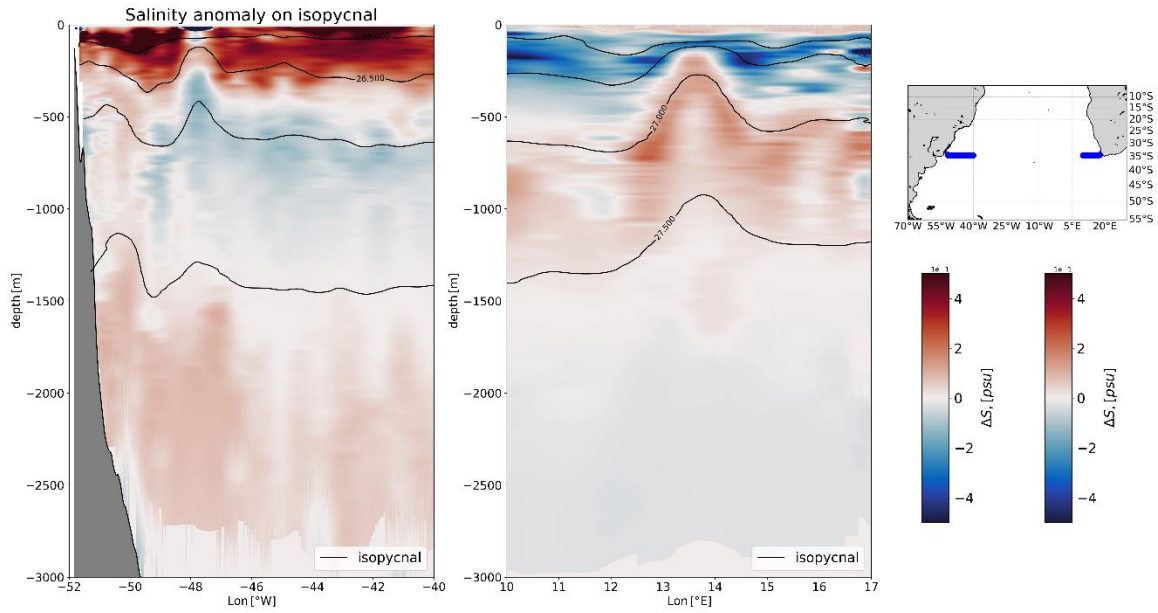

Figure S3. 3 CE N°4, 5 and 6 sampled during MSM60 experiment.

3. Physindien 2011

Figure S4. AE N°8 sampled during Physindien 2011 experiment.

4. M124

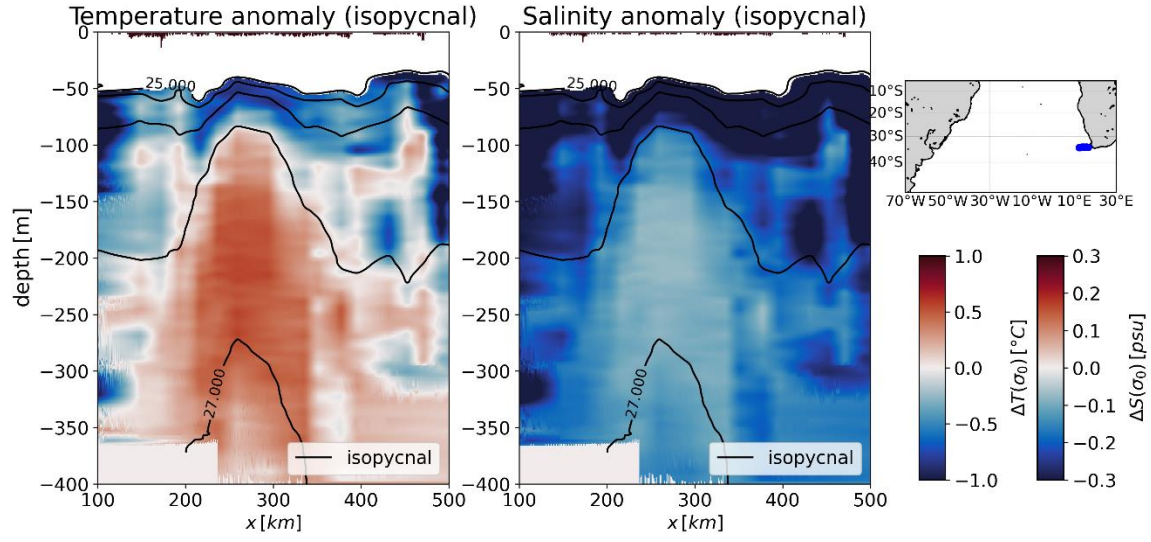

Figure S5. CE N°9 sampled during M124 experiment.

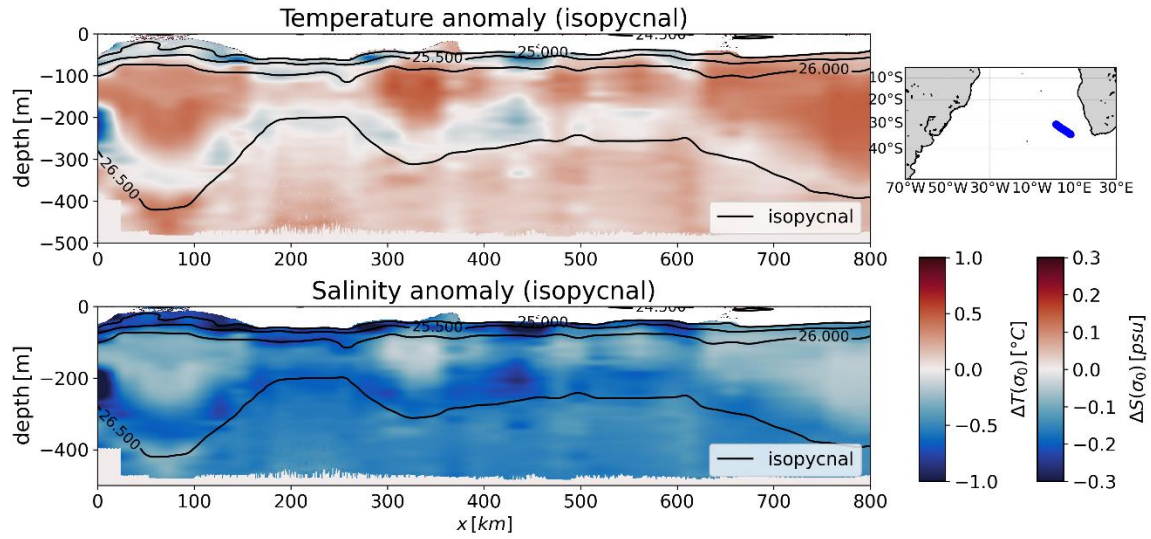

Figure S6. AE N°10, 11 and 12 sampled during M124 experiment.

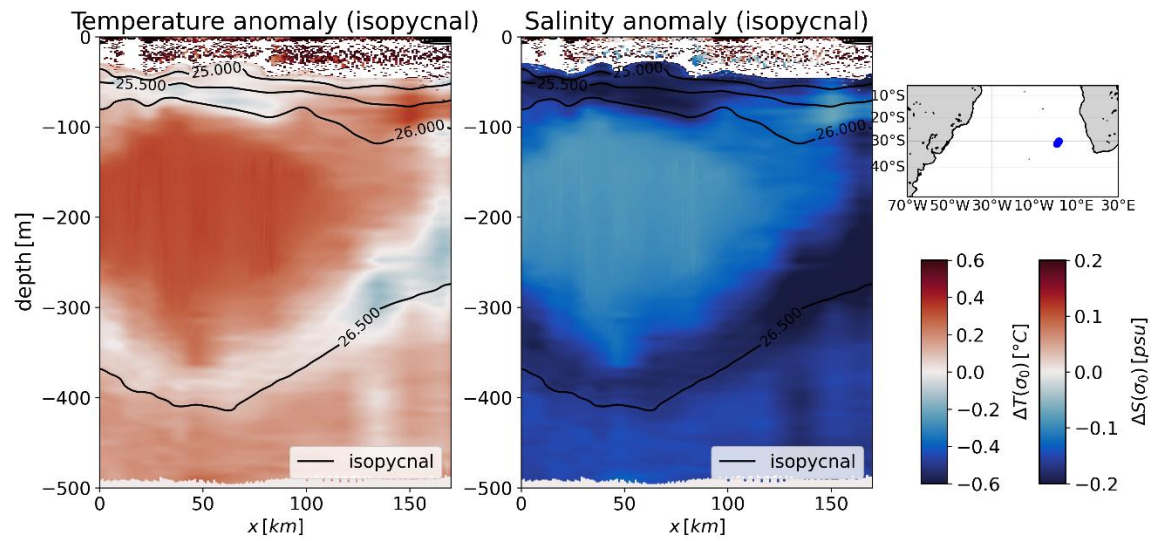

Figure S7. AE N°13 sampled during M124 experiment.

Figure S8. AE N°14 and 15 sampled during M124 experiment.

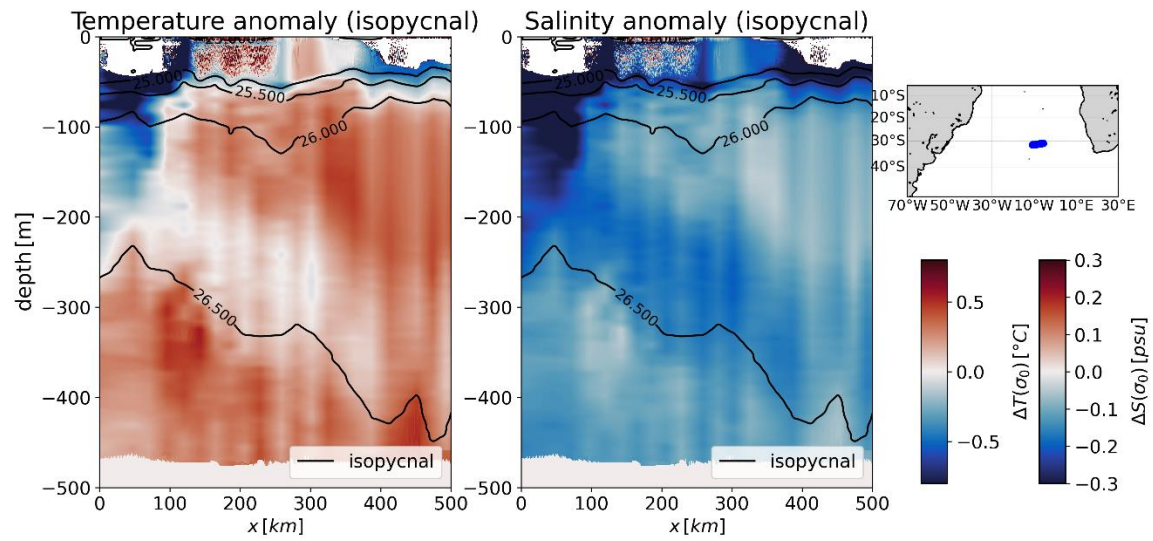

Figure S9. AE N°16 sampled during M124 experiment.

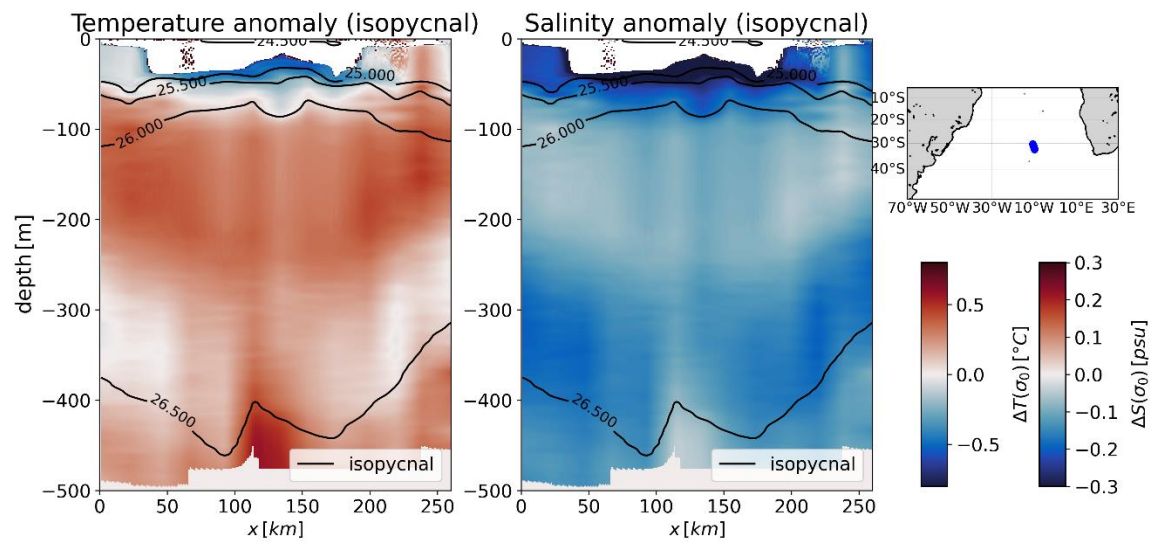

Figure S10. AE N°17 sampled during M124 experiment.

5. MSM74

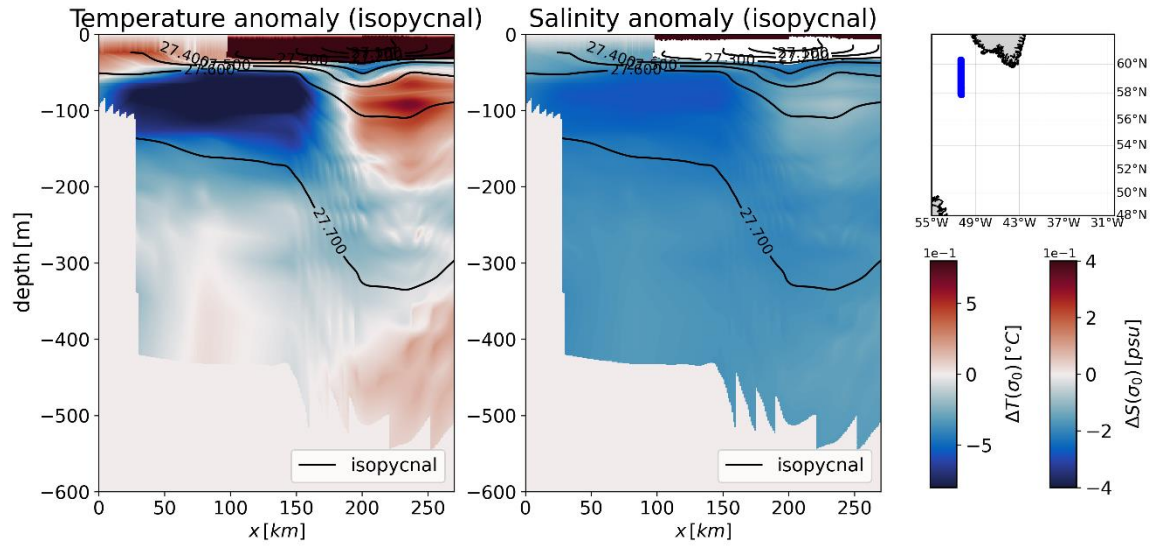

Figure S11. AE N°18 sampled during MSM74 experiment.

Figure S12. AE N°19 and 20 sampled during MSM74 experiment.

Figure S13. CE N°21 and AE N°22 sampled during MSM74 experiment.

6. M160

Figure S14. CE N°23 sampled during M160 experiment.

7. KB2017606

Figure S15. AE N°24 sampled during KB2017606 experiment.

8. HM2016611

Figure S16. AE N°25 sampled during HM2016611 experiment.
